### Azerbaijan Economic University

*Bachelor of Marketing | 2013 - 2017*

## PROJECT

**Technologies:** Java, Spring Boot, REST API, JPA, Maven

**Description:** A digital wallet application that allows users to create wallets and top up their balances. The project uses transaction management to ensure secure and consistent operations. Designed following best practices of Spring Boot and layered architecture.

**GitHub:** <https://github.com/Luna1996D/wallet-system>
